Objective

Open Source Software Developer at innovative projects. Work with a first class team of engineers.

Share and spread the word about everything that I am learning in the community, writing blog posts and books.

Current Work

My current position is CTO (Chief Technology Officer) at Plug Tree (www.plugtree.org) where my main responsibilities are:

- Training people to use Drools and jBPM5
- Creating custom extensions and fix bugs for different customers
- Guiding jBPM5 and Drools implementations for clients in US and Europe
- Spreading the word about Drools and jBPM5 all over the world presenting at international conferences like JudCon, Java One and Jazoon.

Skills

Development skills: contribute to the project Drools and jBPM5 fixing bugs and adding new features, 2008-current.

Some of my main contributions were: Variable Persistence Strategies for Drools and jBPM5, Drools Grid Experimental Module, Training Materials, Bug Fixing, Script improvements and testing, Sub Task Strategies for jBPM5 Human Task Module, examples and tests for both projects.

Writing skills: author of jBPM Developer Guide for packt (2009) and forth coming publication of JBPM5 book.

Training skills: created and designed more than 12 training courses with my own training material in the US and Europe

Consulting & Assessment skills: guiding teams to implement projects using Drools and jBPM5. Active member in the projects forums and mailing lists. I've visited more than 15 different companies in these last two years that adopted Drools and jBPM5.

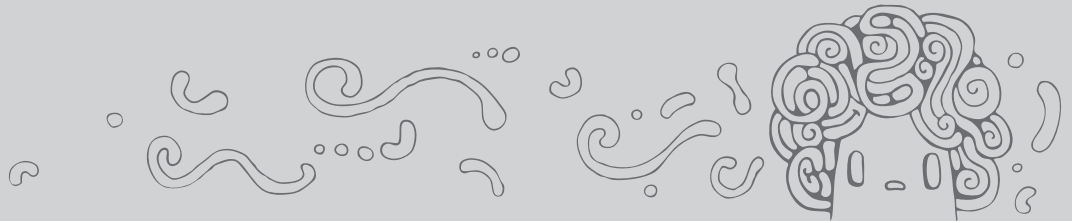

Education and Awards

- Informatics Engineer (Mendoza University – Argentina)
- Jboss Community Award Winner 2011 (New Features – Bug Fixes)
- Most Valuable Programmer for droolsjbpm-integration project. (Master Branch)
